Software

Reports

All too often people look at tags and readers and forget to look hard at the software. To get the most out of your data you need a complete system - tags, readers and software that **work together** and work in the way that you want.

Here at Shearwell we have been designing EID equipment and software for more than twenty years. Our systems are designed to work together to help you make the most of your data.

You can choose from either our fully featured **FarmWorks by SDL** software options or our **NLMD-LT website with our StockMove Express app** with basic management features.

We have money saving bundle options with PC or web based software, an app, a tablet or our comprehensive Stock Recorder and the option to add a Stick Reader. Take a look at the page opposite to compare the features, to see which would suit you.

FarmWorks by Shearwell Data - Software Options

FarmWorks

by SDL

On your PC

Comprehensive farm management software for livestock farmers

- For Cattle and Sheep
- For Pedigree and Commercial Farmers
- Helps identify productive and non-productive animals
- Statutory and management recording and reporting
- Excellent support

Excellent management tool for sheep & cattle

On our Stock Recorder

- Easy to use, robust (survives 6' / 1.8m drops), all in one reader and recorder
- A data collector for FarmWorks by SDL on your PC
- Can be linked by Blue tooth to weigh scales, EID readers and mobile printers
- Select group for automatic drafting (when using our sheep autodraft crate)
- Versatile – electronic or manual data entry
- Historical data can be viewed for individual animals
- Comments can be recorded against individual animals
- Warnings are displayed if an animal is still in drug retention

As an app

FarmWorks by SDL Mobile (FW Mobile) is an app for Android devices - phone / tablet that links to FarmWorks by SDL on your PC.

Use our **NEW** app to record statutory information (births, deaths, movements and tag replacements) plus medical treatments, comments and management groups.

- **NEW Compare your records against ARAMS records** (England only - see back page for more details)
- Record basic management information
- View or print statutory and management reports

Premium – 3 Months Free Trial

- Business hours phone support
- Includes basic features outlined opposite
- Record medicine purchases and animal treatments
- Generate medicine book
- Record comments and management groups
- **NEW Record Weights and monitor daily live weight gain**
- Annual subscription £30

"I have been using StockMove Express and NLMD-LT for just over a year now and am very pleased with it. The whole system works amazing well, being able to have and record all of my flock work on my phone has saved me a lot of time and work. I am sure it is the best software on the market!"

Mr. Fenemore,
Oxfordshire

StockMove Express

App

Our StockMove Express app compliments the NLMD-LT website and enables you to record data while on the farm

Save time by recording information using our StockMove Express app.

StockMove Express is a FREE app that allows livestock farmers to manage their sheep holding register or cattle herd register and also fulfil statutory reporting to ARAMS, BCMS and ScotEID.

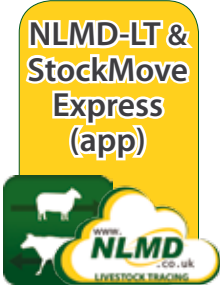

It can link to our EID Stick Reader to read electronic tags. The app is designed for both cattle and sheep and allows the farmer to view and record livestock details when out on the farm. Different levels of reporting available through the NLMD-LT website.

Available for iPhone & Android devices.

Use NLMD-LT to compare your records against ARAMS

**NEW
Feature**

In November 2015 the NFU and NSA advised farmers (in England only) to check the accuracy of their movement records on ARAMS. To help you do this, we have added a **NEW** feature '**Compare ARAMS Movements**' on our website www.nlmd-lt.co.uk.

You can now quickly and easily spot any differences between your records and those kept by ARAMS. Knowing the difference allows you to take steps to resolve the differences, either by amending your own records as appropriate or by contacting the ARAMS bureau to ask for any ARAMS corrections which need to be made (for example an incorrect holding number having been used).

EID Stick Reader

Read EID tags,
transfer data
and print

Our EID Stick Reader is easy to use. Read EID tags, store animal ids in groups on the reader and upload to the PC, mobile printer or our apps. Up to 26 different groups of animals can be stored on the unit enabling multiple movements to be recorded without having to upload in-between.

**Mobile printer
Special Offer £245
Stick Reader - RRP £550**

Save money when you add our
Stick Reader to any of our bundles.

How to get our apps

- 1) Visit Google Play
- 2) Search for Shearwell
- 3) Select one app and download

Please note: FarmWorks by SDL Mobile app is currently only available for **Android** devices and requires a FarmWorks by SDL subscription. Please see pages 4 to 5 for details.

- 1) Visit the App Store
- 2) Search for StockMove Express
- 3) Select the app and download
